

### *Great Soul*

Earth and Spirit together  
make the Great Soul  
the identity of infinity  
Spirit/Earth as Male/Female  
reconciled in the human heart  
begins the time of the  
great emergence  
the flowering sunrise of  
consciousness awakening  
to the sounds of art  
stirring hearts and minds  
into activity of harmony

### *Spirit/Earth*

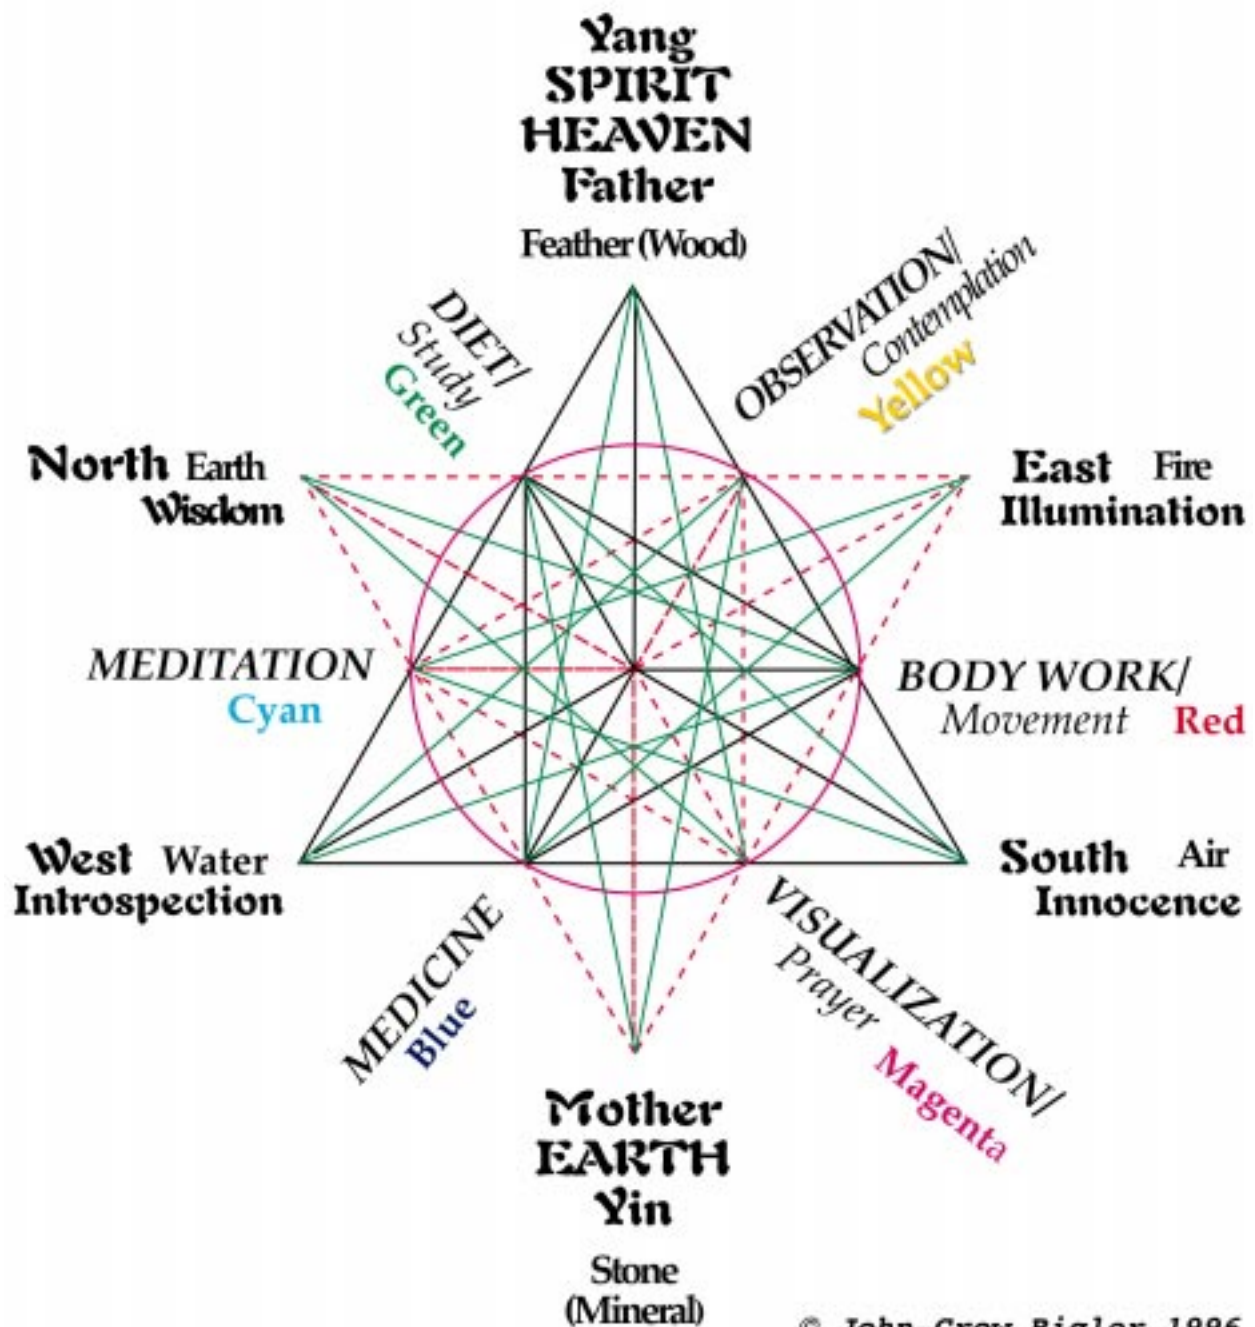

inseparable as the two  
poles of a magnet  
not one without the other  
complex interactions  
spinning the web of  
relationships  
of body and soul  
that binds the universe  
each to oneself  
and each other

### *Healing Circles*

drawn from within  
as spheres of golden light  
ripple outward  
sent on the intent  
of healing and  
indiscriminate love

# Some Keys to The Map

Spirit and Earth, Spirit and Human specifically, form a symbiotic relationship. Each equally contributes its unique set of perceptions and experiences to the other. As a symbiotic unit each aspect is mutually beneficial to the other. Our map starts with the spiral symbols for spirit and earth, which by extension also indicate the complimentary opposite aspects of spirit/human, man/woman, inside/outside, expansion/contraction, yin/yang etc. Each spiral will be represented by its representative triangle. The triangle shows us the three fold nature of the spiril. Within each spiral is movement to the smallest and is infinitely contracting (1) and a movement to the greatest and is infinitely expanding (2) while maintaining its simultaneousity and unity (3) . We use two spirals (triangles), one for each direction or aspect ie: inward/outward, spirit/earth, man/woman etc.

**In a charged (polarized) state the positive Ions are on the outside and negative Ions on the inside.**

# Commentary On The Four and Six Directions

Man has forever used known earth phenomena to describe the unseen esoteric universe.

Laying out the four earthly directions with their respective attributes of consciousness as they appear in the Map we can see the figure eight created as each system maps progress through the growth of consciousness.

"Earth" religions, modern witches  
begin with earth

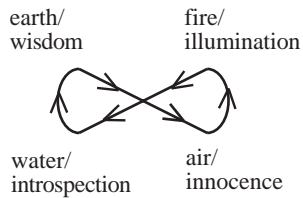

fig.. A

Astrology & western esoteric  
religions, begin with fire

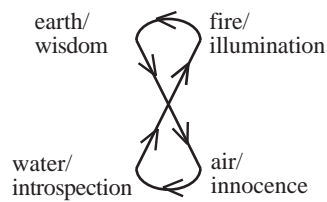

fig. B

Spirit/Earth, begin with water for  
personal growth.

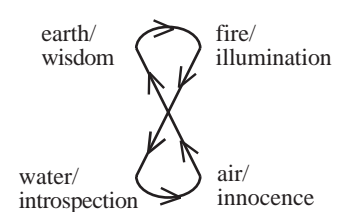

fig. C

The Earth Religions presume that Enlightenment begins with wisdom and progresses through innocence to illumination (fig. A). Modern astrology and many current religions chart personal growth beginning with the fire of illumination and progress to earth then air and on to waters' introspection (fig. B). Each of these two begin with an external source of illumination before progress begins. Spirit/Earth (fig. C) begins personal growth with the all important Introspection and a rediscovering of Innocence which leads to Wisdom then Illumination. Illumination without Wisdom produces blathering idiots, Wisdom without Innocence is either dangerous or irrelevant and Innocence not found within (Introspection) is lost or not recognized. Although Near-Death-Experiences and other awakening phenomena would seem to negate the spirit/earth progression such is not the case. These awakening experiences actually are the Spirit aspect of the individual making itself heard by the Earth (body, brain) part. Most often these experiences are to provoke change and growth of introspection, innocence, or wisdom and must be integrated into and used as such by the individual for personal growth and the greater good of all.
